

# REDIRECTOR

The **id Redirector** web part redirects specific users, SharePoint and Active Directory groups to specified sites and pages based on sequential rules.

Provide SharePoint users with a single URL destination and automatically redirect them to their appropriate sites, reducing the time taken for users to navigate to their own site.

| Feature  |  Microsoft®<br>SharePoint Server |  REDIRECTOR<br>WEBPART |
|--|--|--|
| Redirect all users to a single location.                     | ✓  | ✓  |
| Redirect specific users.                                     | ✗  | ✓  |
| Redirect Active Directory and SharePoint groups.             | ✗  | ✓  |
| Redirect users in multiple groups based on sequential rules. | ✗  | ✓  |
